Technical Data Sheet

GEO COR 128 WS

Corrosion Inhibitor Water -Soluble

Scope of Application	: GEO COR 128 WS is a water-soluble liquid specially formulated to provide excellent corrosion control in hydrocarbon systems. Sour (hydrogen sulphide) is effective against a wide range of conditions including gas and hard pH. GEO COR 128 WS is a non-volatile film-forming corrosion inhibitor and forms a protective barrier against corrosive agents such as hydrogen sulfide hydrochloric acid and organic acids present in the system.
Apperance	: Liquid
Colour	: Brownish
Odour	: Characteristic (Amine)
Specific Gravity	: $1.0 \pm 0.1 \text{ g/cm}^3$
Shelf life	: If storage conditions apply, the shelf life of the product is 12 months.
Benefits	: GEO COR 128 WS <ul style="list-style-type: none">- It is designed to form a protective molecular film on impermeable metal surfaces against H_2S, CO_2 and organic acid corrosion.- A highly effective corrosion inhibitor in both sweet and sour systems as well as in all salt water concentrations,- It is really easy to apply this product with a dosage rate of 10-50 ppm.
Package	: 200 lt drums / 1000 lt IBC .
Storage	: The product should be stored in its original packaging and sealed very well after use. See the MSDS for further information
